

Foundry/Marathon/Campbell Station- Had 40 red dots total.

+++++

Seek ways of protecting view sheds, especially the ridgeline at the south end of Marathon. **This received 24 red dots.**

Comments placed on sticky notes:

1. Save the view from the cove.
2. Do not cut trees.
3. View from the cove is priceless, a sense of wilderness that supports the recreational kayak economy. Do not build on the south end of Marathon.
4. Houses last hundreds of years. Don't build bad ones.

+++++

Public and private spaces have equal importance. Creating a balanced community that serves a wide range of home and business owners. **It received 1 red dot.**

+++++

Campbell Property

Comments placed on sticky notes:

1. What happened to the option of doing nothing with Campbell property? Quite a few residents expressed that.

Comments on the tablet **had 1 red dot:**

1. Note (or Not) pedestrian access to Campbell Lot.
2. You must keep to Village use. Do not allow more strangers, traffic. Keep business and tourism on Main Street. No development or park on the Campbell property.

+++++

Lunn Terrace Extension – **received 4 dots** in favor and **1 against**.

Comments placed on sticky notes:

1. No way, leave it alone. Don't like
2. No, don't let this happen. No more access, keep this are quiet for the current residents, please.
3. Don't like.
4. No more traffic on BLVD. and Kemble.
5. No road, Roads mean more development.
6. No development. No road. No Campbell.
7. We live here for quiet. No road. It would destroy the neighborhood.
8. Don't like the idea.

Comments placed on the tablet:

1. No road at the end of Boulevard and Lunn terrace. It is a quiet street, which is why the people moved there. People already abuse parking there, ignoring people's property. Who will control the noise pollution of the people, cars, motorcycles, and trucks coming through? Who will control speeding? This idea totally ignores the fact that people live here.
2. This idea is only supported by people who live on the other side of the village.
3. If you build a road here, it will allow more development which will bring more traffic.

+++++

Green sign: Explore ways of encouraging mixed use for Marathon. **This received 8 red dots.**

Comments placed on sticky notes:

2. No tourism
3. Gardens
4. Hazardous nature of the site has not been corrected. No new development. Existing Constitution Ave. homeowners deserve serious remediation of underground toxins.
5. No housing. Housing = taxes.
6. View from.
7. Keep open space. This is the only place to enjoy the open space approaching Foundry Cove.
8. The EPA has to give a green light before any development can be contemplated.
9. We need more open space in the Village. This is the last piece of property. Let's enjoy it.
10. Open the Foundry for tours.
11. No development. Keep it green. This is the only open space in the Village. Let's keep it open for residents.
12. Brewery/brew pub.

13. Park or arboretum for Marathon. Environmental Education center. Sculpture park.

Comments placed on the tablet:

3. In Marathon- have light industrial (offices, craftmakers, etc) ok as long as quiet and non-invasive.
4. Marathon "Controlled" development only after appropriate egress.
5. Don't build single family homes on the lot.
6. Keep the space open for community use. This is a vital piece of property for the community. The last open piece in the entire village. Just look at the aerial view. This is the last piece of land of any size.
7. How about a Village green? This is a New England tradition. When you see a Village with a nice green, there really is nothing like it. Beautiful. It shows residents care about their village and take pride in it.
8. The Marathon site has to be cleaned up. There are still big problems on Constitution. Homes are contaminated. EPA has to do their Job. Why are there still gas plumes. Why won't the EPA give an unconditional green light. Are they "passing" the responsibility to the Village for generations to come. We have to be careful! We will be responsible for the liability that will occur. This has happened elsewhere. Please let's get this cleaned up first. The residents with gas readings off the charts need this addressed before anything happens.
9. The county should rescind the old health approvals on this property. They predate the superfund discovery. It is irresponsible that anyone would think they can build there now. And it is our responsibility too.
10. Build an organic hydroponic farm facility.
11. Leave open. Develop as an agricultural land used for production of high value organic foods that would not be harmed by previous uses. Permit agricultural support buildings. Storage. Processing facilities. No residences. Bring in dept of Agriculture specialists to determine feasibility and income benefits to community. Include teaching section for training school children and future experts in agriculture.

+++++

The main sign of the display received 1 red dot.
