

## Introduction

### Note on Written Comments

*These files consist of the written comments by survey respondents, section by section. (Not all sections solicited written comments.) Each comment is included in the exact words of the respondent. For ease of reading, spelling has been corrected, basic punctuation applied, and a consistent style of capitalization used for the beginning of each complete sentence. Phrases and other non-sentences have been typed without first-word capitalization.*

*For purposes of identification **only** as results were transcribed, compiled and verified, each survey was given a number, from 1 through 333. No names appear here. There were 326 valid surveys returned. Seven responses were not valid because the respondent checked off that he or she was not a resident or was under age 18, did not check whether a resident or not, or did not answer any questions.*
